**Github:** [github.com/laophan74](https://github.com/laophan74)

**Portfolio:** <http://laophan.com>

---

### SKILLS

- **Programming languages:** JavaScript, Java, C#
  - **Database:** MongoDB, SQL, Firebase, Supabase
  - **Frameworks and libraries:** Node.js, React, Next.js, Express.js, Tailwind CSS
  - **Cloud:** AWS, Cloudinary, Cloud Firestore
- 

### EXPERIENCE

#### Intern | Oct 2022–Dec 2022

*ITR VN: Technology Design and Engineering*

**Technologies:** React, Express.js, MongoDB

**Responsibilities:**

- Developed a URL shortening web application using JavaScript, MongoDB, and Express.js
- Designed and implemented RESTful APIs for generating and retrieving shortened URLs
- Built database schema and handled data storage using MongoDB
- Tested and debugged backend functionalities to ensure reliability

#### Intern | Oct 2025–Dec 2025

*Integral Immersive Analytics Lab, Western Sydney University*

**Technologies:** WordPress, MySQL

**Responsibilities:**

- Developed and maintained the lab's website using WordPress and PHP
  - Built and customized web pages to showcase research projects and publications
  - Integrated backend data with frontend components for dynamic content rendering
- 

### PROJECTS

#### LinkedOut Social Media (Individual Project)

<https://linkedout-frontend.vercel.app/>

- Developed a full-stack social media application with React (Redux, Tailwind CSS) and Node.js (Express, MongoDB)
- Designed RESTful APIs for posts, comments, and user interactions
- Integrated media upload using Cloudinary
- Deployed frontend on Vercel

### **BanhComXuaNay – E-commerce website (Team of 2)**

<http://banhcomxuanay.com>

- Developed a full-stack E-commerce website application with Next.js and Nest.js (MongoDB)
- Developed the front-end storefront in Next.js with responsive UI
- Built API-driven integration between the storefront and backend services to support product catalogue and order workflows.
- Applied server-side rendering and front-end optimisation practices to improve performance and user experience.

### **Coach Ticket – Mobile Booking App (Team of 2)**

- Built an Android app for coach ticket booking using Java and Firebase
- Implemented core features including ticket search, booking, and user management
- Designed UI and navigation for a smooth user experience

---

## **EDUCATION**

**Western Sydney University | 2024–2026 | Sydney, Australia**

Master of Information and Communications Technology

**University of Information Technology | 2019–2023 | HCM City, Vietnam**

Bachelor of Software Engineering
